

The Big Picture

Goals

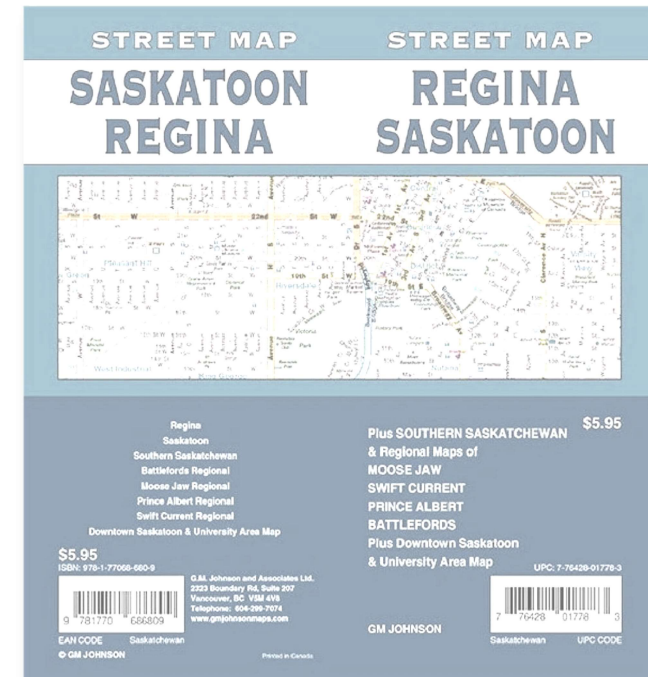

1. Explain the difference between React and React Native
2. Lorem ipsum

Roadmap

1. History
2. Comparisons
3. Architecture

History

Motivation

The biggest mistake we made as a company was betting too much on HTML as opposed to native.

-- Mark Zuckerberg, 2012

Motivation (Continued)

- Users like apps
 - 92% use apps and social media weekly
 - 8% use web browsers weekly
- Users like
 - Installing things
 - Native performance
 - Native look and feel

Overview

- Facebook project, ~2015
- Mismatch between web and native
- No HTML or CSS

Native Users

- Microsoft
- Facebook

Market Share

Market Share

Platform	Market Share %
React Native	42
Flutter	39
Cordova	18

Targets

- Free, in the box
 - iOS -
 - Android -
- From Microsoft
 - Windows
 - OSX
- Web - Community project
- Also: **Android TV, tvOS**

Hello World

```
1  import { useState } from 'react';
2  import { StyleSheet, Text, View, Button } from 'react-native';
3
4  export default function App() {
5    const [clicks, setClicks] = useState(0);
6    return (
7      <View style={styles.container}>
8        <Text>Hello World</Text>
9        <Text>Clicks: {clicks}</Text>
10       <Button title='Increment' onPress={()=>setClicks(clicks+1)}>/>
11     </View>
12   );
13 }
```

Comparisons

Progressive Web Apps

- Moving parts: Manifest, WebAssembly, Web workers
- No Apple app store
- Ratings
 - **Easy for web developers** ★ ★ ★ ★ ★
 - **Performance** ★ ★ ★ ★ ☆
 - **App Store** ★ ★ ☆ ☆ ☆
 - **Native Look and Feel** ★ ★ ☆ ☆ ☆
 - **Native APIs** ★ ☆ ☆ ☆ ☆

Compared with HTML5

- No HTML legacy elements like

Compared with CSS

- No selectors
- Strongly typed
- No inheritance (*well, not much*)

Architecture

Overview

- **Background thread** runs Javascript
- **Native bridge** communicates

Rendering

- Fabric is the new native renderer.
 - Maps react components to host native controls
- Same process as React DOM
 - **Render** - Build shadow component tree in memory
 - **Reconcile** - Calculate changes to actual layout
 - **Commit** - Transform into host view tree

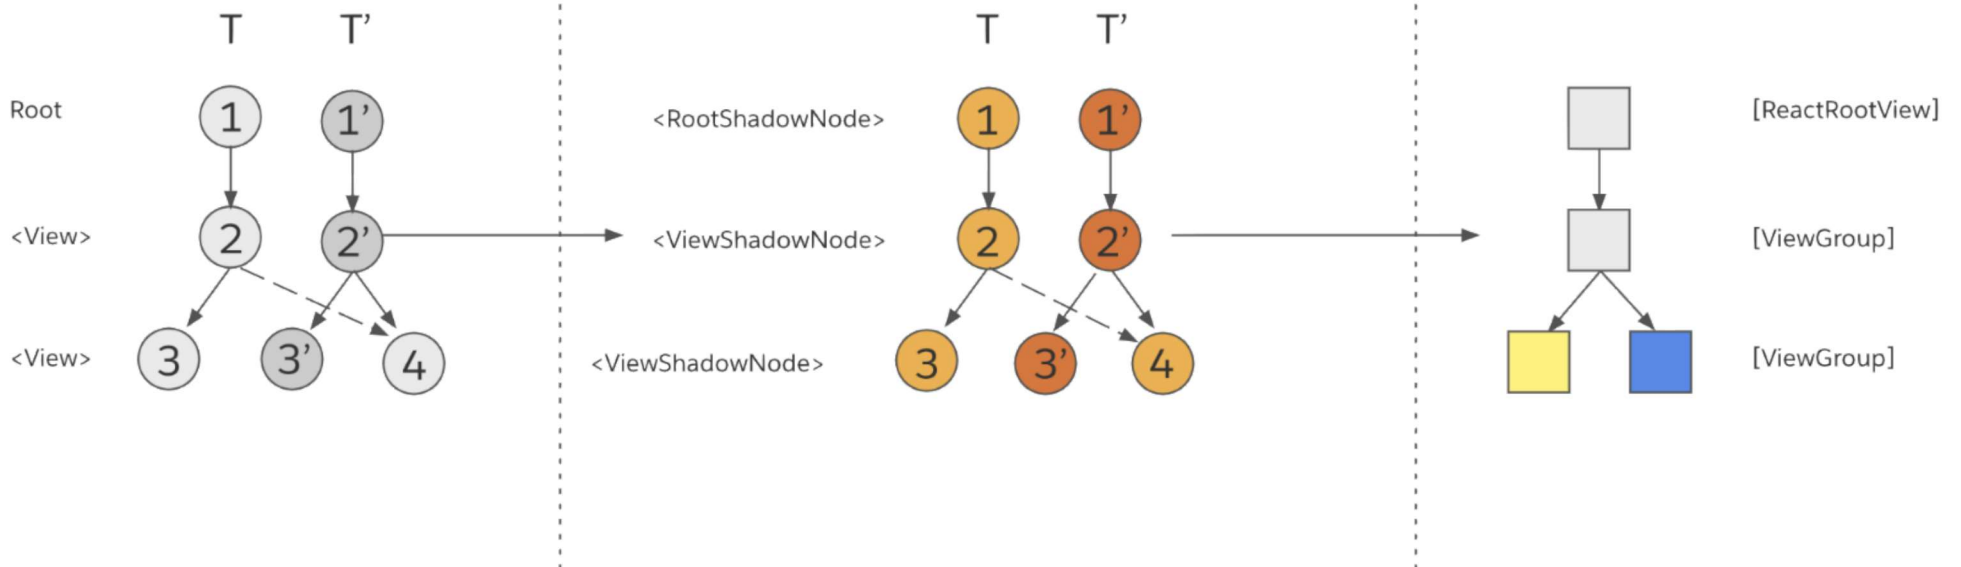

Rendering (cont...)

REACT.JS

REACT NATIVE FABRIC

NATIVE SCREEN

Interop

Building

- Metro is the build system
- Uses Babel

Javascript

- Hermes is React Native's Javascript engine
- Deploys with your package
- Uses AOT compilation
- Smaller than JavaScriptCore

Resources

- [ReactNative.dev](#) (It's actually good.)

Review

1. Explain the difference between React and React Native
2. Lorem ipsum
